## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Harms (Reg. No. 38,911 on March 1, 2005).

The application has been amended as follows:

Regarding claim 1, line 10, "on said pilot channel" should be corrected as ----on a pilot channel----.

Regarding claim 5, line 16, "on said pilot channel" should be corrected as ----on a pilot channel----.

Regarding claim 14, line 16, "on said pilot channel" should be corrected as ----on a pilot channel----.

### ***Allowable Subject Matter***

2. Claims 1-15 are allowed.
3. The following is an examiner's statement of reasons for allowance: many references in the art disclose a) a system to warn of an approaching emergency vehicle comprising at least one sensor to sense the alert-status signal transmitted from an

Art Unit: 2632

emergency vehicle and provides an output signal thereof, such that found in Buscemi (US 6,859,147), b) a rear collision warning system comprising a first transmitter located on an approaching vehicle for transmitting a vehicle information signal and a first receiver located on a target vehicle for receiving the information signal, such that found in Strumolo et al. (US 6,831,572). The prior art of record does not teach or suggest, in the claimed combination, a vehicle communication system comprising:

a first system component mounting in a first vehicle having a transceiver, heading determining means, and visual display means, wherein the first system component having a default mode for monitoring a pilot channel for a pilot signal broadcast from a second system component broadcast from a second system component mounting in a second vehicle, a response mode triggered by receipt of the pilot signal, transmitting a response signal including at least a heading of the first vehicle, and a display mode, triggered by a second signal from the second system component, provides a visual warning of the proximity of the second vehicle; and a second system component having a computer, means to determine the directional travel of the second vehicle, means to broadcast a pilot signal on a pilot channel, means to receive transmission from the transceiver in operative communication with the computer, means to determine the separation distance between the first and the second vehicles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
